

CAULIFLOWER

Cauliflower is well-named because it really is a flower. The part that we eat consists of a cluster of flower heads. If left alone, these would produce a cluster of tiny flowers.

PRODUCE PARTICULARS

Cauliflower comes in varying colors other than white such as green, purple and orange.

Cauliflower is related to broccoli, cabbage, kale, turnips, rutabagas and Brussels sprouts.

This vegetable is loaded with vitamins, primarily Vitamins C & K!
